

**Environmental Records
Information Centre**
North East

Make Your Records Count!

How your sightings can help protect our region's wildlife

Paul Stevens
ERIC North East Coordinator

Who are we?

Environmental Records
Information Centre
North East

Paul Stevens

ERIC NE Coordinator

Fiona Greenwold

ERIC NE Engagement Officer

Anne Donnelly

Irene Zaina

ERIC North East Officers

and a team of fantastic volunteers!

Based at the Great North Museum: Hancock in Newcastle

What is ERIC North East?

Environmental Records
Information Centre
North East

Collate species and habitat data for the region

Make the information accessible to those who need it for nature conservation purposes

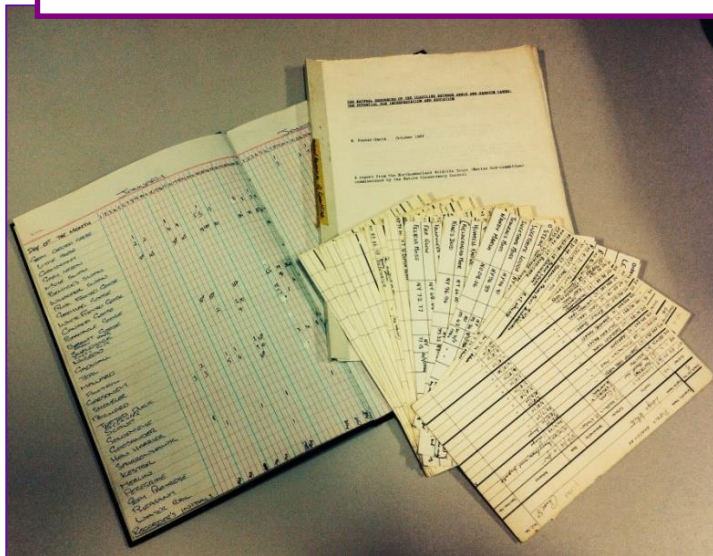

What is ERIC North East?

Environmental Records
Information Centre
North East

Encourage more people to log their wildlife sightings

Find and use records that would otherwise be lost

Currently hold over **3.6 million** species records

ERIC's area of coverage

Part of a network of
records centres
nationally

Where does the data come from?

Environmental Records
Information Centre
North East

- Community groups
- Naturalist groups and societies
- Organisations like the Wildlife Trust
- Many individuals

Without their enthusiasm, we would know far less about the natural world than we do today.

What is a wildlife record?

Environmental Records
Information Centre
North East

A wildlife record is a documented occurrence of an animal or plant at a location, at a specific point in time by a named person

Every valid record needs:

Species name

Observer name

Date

Location (including grid reference)

What is a wildlife record?

Easy to search the records

Environmental Records
Information Centre
North East

By site boundary

By grid square

NZ2244

NZ1234

By species

By taxon group

Who uses the information?

769 requests for data to inform
planning applications and
development

14 requests for ecological data to
inform biodiversity and conservation
projects across the region

Data supplied to inform **8**
academic research projects

Informed the work of **6** local authorities
and **1** government agency

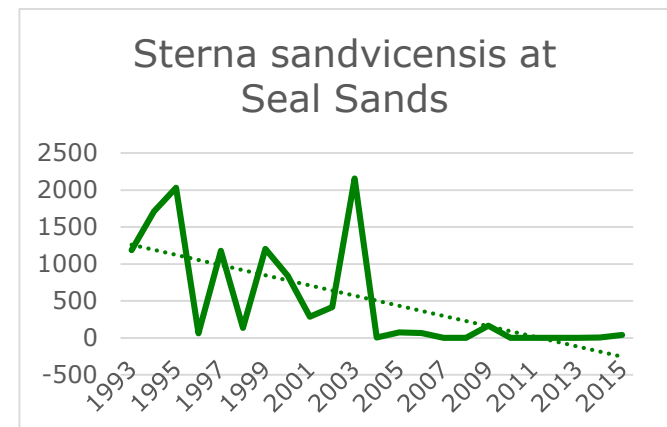

How is the information used?

Examples of data uses:

Check whether protected species are present on a possible development site

Monitor change in species distribution.

Monitor improvements / decline in species of conservation concern for a specific area

How is the information used?

Dragonflies and Damselflies of Northumberland and Durham

- Snapshot of Dragonflies and Damselflies of Northumberland and Durham
- Useful, easy read reference guide for all
- Encourages people to fill the gaps
- Importance of recording all species, common or rare
- Adds context to the records

How is the information used?

Big Watch Weekend Whale & Dolphin Survey

Result = more comprehensive evidence base for whale, dolphin and porpoise conservation

How is the information used?

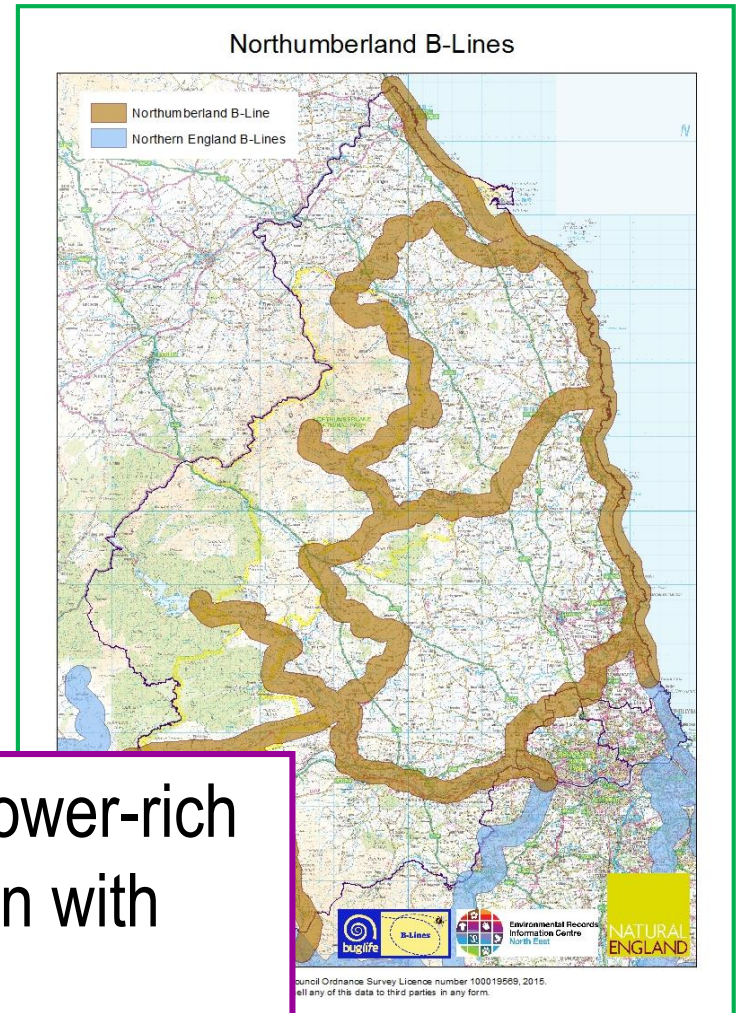

Environmental Records
Information Centre
North East

Buglife B-Lines Project

Analysed habitat data to identify flower-rich pollinator pathways, linking these in with networks in other regions.

Anyone can help protect their local wildlife by recording it!

In your garden or on your way to work

We can assist – Small Grants Fund

Families & children

What should we record?

Environmental Records
Information Centre
North East

EVERYTHING!

Common or rare

Who knows what could be 'common' or rare in 25 years!

Plant, animal, fungus

Yellow-rumped warbler

Recorded by children
taking part in RSPB Big
Garden Birdwatch!

Or rabbit

What should we record?

Environmental Records
Information Centre
North East

Fields signs count!

Fox scat

Molehill

Nests

Badger latrine

What's in it for me?

Environmental Records
Information Centre
North East

Easy way to make a real contribution to nature conservation

You don't need to be an expert

Help protect your local green spaces

Improve your species identification skills

Lots of public surveys to join in with

It's good fun!

You don't need to invest a huge amount of time

Assistance with recording

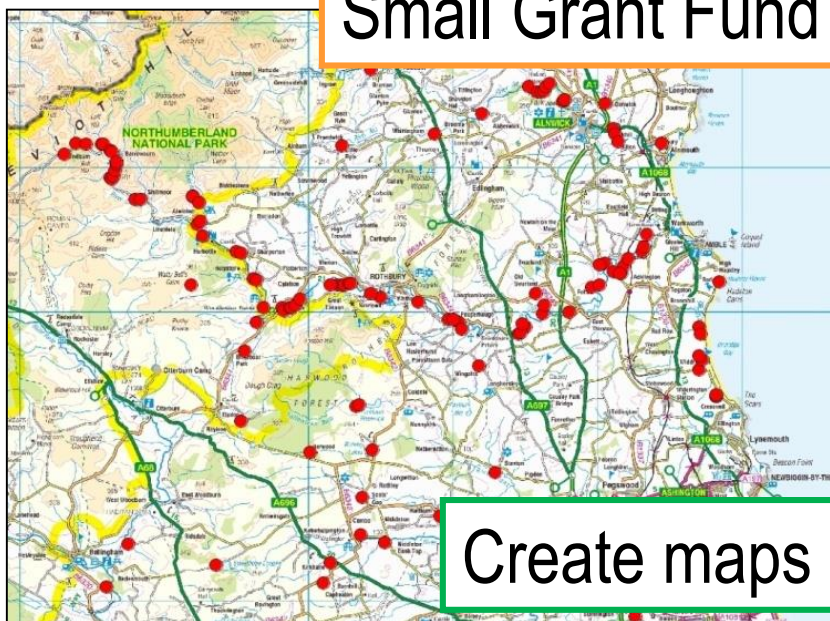

Environmental Records
Information Centre
North East

Species identification training

Annual Wildlife Recording
Conference

Small Grant Fund

Type up your records

Create maps

Put you in touch with experts

Who shall I send my records to?

Environmental Records
Information Centre
North East

There are lots of groups, societies and schemes who collect wildlife sightings

This is fantastic but confusing!

Speak to us and we can help recommend, depending on your interest and knowledge.

Home

Welcome back Katherine.

Latest sightings

The following list of records includes verified records and those awaiting verification of species groups you are interested in which have been recently added in your area.

Species	Site name	Grid Ref	Date	Recorder
Hirundo rustica Barn Swallow		NU277043	06/04/2014	Lamb, Andrew
Riparia riparia Sand Martin		NZ205928	06/04/2014	Lamb, Andrew
Prunus spinosa Blackthorn	Acklington	NU235014	06/04/2014	Lamb, Andrew
Halichoerus grypus Grey Seal	Hadston Carrs	NU276002	06/04/2014	Lamb, Andrew

Are the wildlife records we collate reliable?

Environmental Records
Information Centre
North East

Local and regional experts or County Recorders examine the records for accuracy

i.e. Is the date given for an observation credible in relation to the biology of the species?

Is sensitive species information kept safe?

Environmental Records
Information Centre
North East

- ❑ The recorder / recording group can impose any restrictions they like on the data
- ❑ Sensitive Species policy
- ❑ IT systems are secure and backed up daily

Take the
**City
Nature
Challenge**

How to Participate in the City Nature Challenge

April 24-27, 2020

1. Download the iNaturalist app & make an account.
2. April 24-27, take photos of **WILD** plants and animals to make observations.
3. Be careful using the automatic suggestions for species. Look for suggestions that say “seen nearby” AND “visually similar.” If you don’t see a suggestion that fits, it’s best to type in an ID (even a coarse ID like “plants” or “animals” or “fungus” is fine!) or leave that field blank.
4. Upload your observations to share with the iNaturalist community.
5. Learn more as your finds get identified, and help others by identifying their observations!
6. See how your city is doing by checking the leaderboard: citynaturechallenge.org/leaderboard. Results will be announced May 6!

For more information visit
citynaturechallenge.org

Any questions?

www.ericnortheast.org.uk

All of the records shared with ERIC
North East will be **put to good use**

Result: a more comprehensive
picture of the wildlife of the region
